Minimum HP	110 hp
Width	3450 mm
RPM	750 rpm
Number of Y-Blade	64 pcs

Description

Flail shredder; also known as Flail Mower or Chopper; is used to shred plant wastes after harvest. All the plant wastes and residues got broken in very little pieces. With the process, residues can dissolve in the soil easily. The process enhances soil microorganisms, so; soil quality. It can be also used as weed mower if needed.

Plant wastes will be mixed with soil, therefore soil recovers its organic material.

It also shreds the wet plant wastes and stems.

It can be used for living plant stem and branch mowing too.

Wider working width saves time and fuel in large fields.
