Description

The Porto M 170 is a 170 cm wide transport box that mounts on the tractor's three-point hitch. It is a practical everyday helper for every tractor owner who has a lot to carry: perfect for collecting firewood and clearing debris, and ideal for moving soil, gravel, tools, crates, sacks and other loads around the farm.

The box is tilted up and down by a hydraulic cylinder working from the tractor's hydraulic outlet, so the load can be tipped out from the driver's seat without lifting by hand. For transport, the tractor's linkage raises the whole box.

Its 170 cm width gives a large loading area for mid-size tractors.

Standard equipment

- Three-point hitch frame
- Hydraulic tipping with hoses
