Parameters

Name	Value
Capacity (kg)	300 kg
Working width	6 000 – 14 000 mm
Number of discs	1 pcs
Number of blades	4 pcs
Drive	Tractor PTO .
CAT	1 / 2
Minimum HP	20 hp
Working speed	max. 15 km/h
Type of Steel used	Hopper: PVC, frame: steel .

Description

The Kraffter JP300 is a three-point mounted salt spreader with a cone-shaped plastic (PVC) hopper on a steel frame. It spreads salt in powder or granular form over the surface, for example on farmland and pasture.

The tractor PTO drives a single spreading disc with 4 blades. The spreading width is 6 to 14 metres and the spreader is operated manually. With the optional plastic border spreading hood the spreading width can be limited down to 1 metre, while the maximum spreading width of 14 metres remains available.

The JP300 holds 300 kg, fits Cat. 1 and Cat. 2 three-point linkages, needs a tractor of at least 20 hp and can be used at speeds up to 15 km/h.

Standard equipment

- Cone-shaped PVC hopper, 300 kg
- Steel frame with Cat. 1 and 2 three-point hitch
- Single spreading disc with 4 blades
- PTO drive
- Manual operation

Options

- Mesh screen insert for the hopper
- Spreading curtain
- 7-pin road lighting
- Tarpaulin cover
- Stainless steel spreading disc
- Hydraulic shutter for the spreading disc
- Hydraulic motor instead of PTO drive
- Galvanized frame
- Plastic border spreading hood
