Description

Metal-Technik MTS Sweeper
The MTS sweeper is used to sweep flat surfaces such as roads, squares and sidewalks. The machine is designed for aggregation with a small carrier equipped with a front three-point linkage. The sweeper is driven by a PTO shaft.
hitch equipped with terrain copying,
hydraulic lifting of the shovel,
hydraulic sweeper turn,
side brush (optional extra)
sweep function,
rubber jacket between the brush housing and the shovel to reduce dust formation,
easily replaceable plastic or plastic-metal brushes,
possibility of equipping the machine with sprinklers and a water tank (additional option)
Front three-point linkage only (Municipal, 0 or I small or I large)
The sweeper is driven by a PTO shaft.
PTO rotation right and left possible, PTO shaft speeds of 540 RPM, 1000 RPM and 2000 RPM
possible Terrain following, hydraulic shovel turning and lifting, sweep function
