Parameters

Name	Unit
Working width	1600 mm
Working speed	0-8 km/h
Oil flow	30 l/min
Hydraulic pressure	150 bar
Weight	225 kg

Description

The Elkær Berry Trimmer 4R Easy Steer trims berrybushes fast and effectively. The fruit-carrying branches are trimmed in a V-shape immediately after the harvest, ensuring a continuous renewal of the branches. This provides the best possible yield from your bushes and makes the time and labor consuming harvest-process easier. The Berry Trimmer 4R Easy Steer may drive as fast as 8 km/h without compromising maneuverability due to the Easy Steer system. It is a highly flexible tool with a capacity to suit all needs. The Berry Trimmer has a working width of 1.6 meters. It may be adjusted to different row-spacings, and it uses only 30 l oil/min, and thus making it possible to mount it on the front on almost every tractor. More- over, the Berry Trimmer is fitted with a mechanical device, which enables you to cut right at the root of the bushes.
