### Parameters

Name	Unit
Weight	2973 kg
Max. Allowed Weight	1600 kg
Motor	Electric (48V) .
Wheelbase	145.3 cm
Wheels	F (18x7-8) R (16x6-8) .
Lifting height	3335 mm
Height	2055 mm
Width	1060 mm
Length	3122 mm
Speed	0-20 KM/H
Battery	48/660 Ah

### Description

**Reliable and well-maintained Toyota 8FBM16T electric forklift**, manufactured in 2017 — an ideal choice for warehouse and industrial operations. The **48V electric drive** ensures quiet, energy-efficient, and environmentally friendly performance, while the **battery is in good condition**, regularly charged and maintained for long operating times. With the included **external charger**, recharging is quick and easy, keeping the machine ready for work at all times.

With a **lifting capacity of 1,600 kg**, this forklift offers excellent stability and safety, supported by the **Toyota SAS (System of Active Stability)**, which helps prevent tip-overs and enhances operator safety. The **Toyota ORS operator seat, integrated hydraulic mini levers**, and **direction switch on the armrest** provide outstanding comfort and intuitive operation throughout the workday.

Equipped with **wet disc brakes, hydraulic power steering**, and an **automatic parking brake**, the forklift delivers precise handling and safe braking in all conditions. The **digital multifunction display** provides clear information on operating hours, battery status, and other essential parameters, while the **adjustable steering column with memory function** allows for personalized ergonomic adjustments.

With a **maximum lift height of 3,335 mm, 1,000 mm long forks**, and a **wide-view mast**, loading and stacking are easy and precise even in confined spaces. The **pneumatic cushion tires** ensure good traction and smooth driving, while the **tires are in excellent condition**, making the machine ready for immediate use.

Overall, this Toyota electric forklift is a **reliable, safe, and efficient piece of equipment**, perfectly suited for demanding daily operations.
