Description

The GG010G is a powerful tracked loader with 1000 kg capacity, driven by a Kubota V2607 engine (67.86 HP). At 4150 kg with up to 21 MPa hydraulic pressure and 108 L/min flow, it's built for the toughest jobs on rough terrain. The crawler tracks provide maximum traction on mud, sand, and slopes. Designed for heavy construction, earthmoving, and demanding terrain work where wheeled machines simply cannot perform reliably.
