Parameters

Name	Value
Weight	200 kg
Attachment	euro .
Side move	800 mm
Hydraulic pressure	140-180 bar
Oil flow	15 l/min

Description

Universally usable tool carrier frame for tractors, front loaders, telescopic loaders and other loaders. - Design equipped with Euro loader adapter - Pallet fork connection, which further increases the versatility of the frame - The frame is suitable for receiving hydraulic implements - Manually, approx. It can be extended laterally by 80 cm, so that the position of the machine can be easily adjusted to the work area - The lateral extension allows for more flexible access to the work area - The design of the frame allows the horizontal position of the machine to be adjusted to the given work task - Designed with a side counterweight, which reduces vibrations and loads on the machine even when extended - The Jansen THS-180 hydraulic cutting device can be connected to the frame - The frame can be optionally expanded with a Jansen AS-400K branch cutting head, making it suitable for cutting thicker branches - Its robust design makes it suitable for agricultural, municipal, gardening and land maintenance work - The advantage of the design is the versatile machine connection and flexible work positioning
