Parameters

Name	Value
Working width	700 mm

Description

The Alvi M 700 is mainly used for weed removal and cleaning of paved surfaces such as pavements, roadsides, yards or industrial areas. It is particularly useful for those who are looking for a sustainable weed control solution without the use of chemicals. Ideal for municipalities, road maintenance companies, gardening companies and farmers who carry out weeding work in smaller areas (e.g. driveways, playgrounds...) Its hydraulic operation and Euro front adapter make it easy to integrate with different machines while cleaning surfaces with high efficiency.
