Max tree diameter	8 cm
Outcoming piece	6...12 cm
Production (m³/h)	4 m³/h
Weight	145 kg
Dimensions	149x75x123 mm

Description

Wood chipper AM-80BD is chopping branches, slats, and other wood waste into billets 60-120 mm in length. The maximum diameter of the branches is 80 mm, depending on the species and the humidity of the tree. Finished firewood enters the hopper which has the ability to package the product into a 500x800 mm grid. The chopper is equipped with a gasoline engine with a power of 7 hp. On the chopper frame there are wheels that make it easy to move the chopper through the territory.
