Parameters

Name	Unit
Working width	1750 mm
Max tree diameter	20 cm
Hydraulic pressure	160-210 bar
Oil flow	45-70 l/min
Weight	790 kg
APPLICATION TYPE	Euro mount .

Description

The Jansen AS-600 branch saw is a high-quality tool specifically designed for tractors. Equipped with three specially hardened saw blades, each measuring 600 mm in diameter and featuring 80 teeth, this saw can easily handle branches up to 200 mm thick, providing an exceptionally clean cut. Thanks to its hydraulic drive system, the saw operates smoothly and efficiently, making it ideal for pruning trees, shrubs, and bushes. With a working width of approximately 1750 mm, it allows for quick and efficient work in larger areas.
