Parameters

Name	Unit
Cutting width	1150 mm
Weight	250 kg

Description

The ATV mulching mower units offer you great flexibility. You can tow this mulching lawnmower unit, with a quad, ATV, mowing tractor, a narrow-gauge tractor and even your personal vehicle. Thanks to the installed petrol engine, with an impressive 15 HP performance, you can stay independent, and on the move.

The mowing unit is connected to the towing vehicle with a simple ball head coupling.

The cutting height can be simply adjusted using the threaded spindle below the drawbar. For the transport position the screw jack can be used.

The four-stroke petrol engine drives the mowing unit via 2 V-belts.

A heavy trailing roller has been installed towards the rear of the mulcher. The engine can be simply started using an electric starter; the 12 volt battery comes as part of the delivery. Alternatively the engine can be started using a recoil cord.

The 20 installed hammer blades (approx. 400 g) cut the clippings to the minimum size. Even very high grass, bushy or straw-like clippings are no problem for this mower! Thanks to the large, stable pneumatic tyres, the mower can also be moved on very uneven surfaces without difficulty.

Technical specifications:

4 stroke engine, 420 ccm, 15 HP

12 volt starter motor

Recoil starter

Drive via 2 V-belts

Total weight (dry): 250 kg

Petrol

Tank capacity: approx. 6 litres

Fuel consumption: approx. 1.5 - 2.0 L/h

Cutting width: 1150 mm

Cutting blade type: 20 pc. hammer blades, approx. 400g

drive shaft Ø: 100 mm

trailing roller Ø: 95 mm

Measurements of machine: 180x174x88 cm (LxWxH)

Measurements of packaging: 150x87x108 cm (LxWxH)

Weight including packaging: approx. 332 kg
