Description

Metal-Technik Disc cultivator AT-2500 with hydropack
Disc cultivator with hydropack and packer roller – comprehensive tillage and seeding in one pass
The disc cultivator with a hydropack and packer roller is a modern solution for intensive soil cultivation, combining high efficiency with precise field preparation for sowing.
Two rows of discs mix crop residue efficiently, while the heavy packer roller ensures optimal soil compaction and leveling. The built-in hydropack allows easy installation of the seeder, which allows you to perform two treatments at the same time.
It is the ideal choice for farms looking to save time, fuel and labour while maintaining high quality cultivation.
Specification of the AT-2500 disc cultivator with hydropack:
Width 2.5 meters
Discs with a diameter of 560 mm and a thickness of 6 mm
Spacing between rows of discs - 75 cm
Maintenance-free 5-hole hubs
Rubber shock absorbers
Hydropack
Side screens
Seed drill support feet
Packer shaft diameter 500 mm
In the three-point linkage standard cat. 2 and 3
