**Parameters**

Name	Value
Weight	335 kg
Operating width	1130 mm

Description

The Jansen BM-120, which attaches to a hydraulic excavator arm.

It is suitable for maintaining uncultivated or hard to reach areas and ideal for mowing embankments. The Jansen BM-120 excavator mulcher cuts grass, scrubs and branches up to approx. 3-4 cm in diameter. It attaches to a small to medium size 6-8 t excavator.

suitable hydraulic system with a flow rate of 60-100 L/min to power this unit. The built-in hydraulic motor powers the flail shaft via 3 toothed belts.

Includes a self-levelling coupler (parallelogram guide). The quick-release receptacle for your excavator is sold at the usual trade outlets and must be connected to the coupler of our mulcher! It therefore requires modifications.

The tough housing ensures a long life. Suspended galvanised flaps at the front of the mower prevent rocks, etc. from being kicked out.

The flail shaft with a diameter of 128 mm is equipped with robust 1.2 kg hammer flails.

Technical specifications:

Operating width: approx. 113 cm

PTO: hydraulic, gear motor

Oil leakage line necessary

Oil volume: 60-100 L/min.

Max. hydraulic operating pressure: max. 200 bar

Flail shaft diameter: 128 mm

Trailing roller diameter: 150 mm

Number of hammers: qty. 10 (1.2 kg)

Self-levelling coupler (parallelogram guide)

Hydraulic hoses with quick couplers(LSQ-S1, 3/4")

Weight: approx. 335 kg

Packaging dimensions: approx. 145x96x85 cm (LxWxH) Weight incl. pkg.: approx. 361 kg
