Description

The Jansen BMM-130 front mower is - as the name suggests - engineered for front mounting and, thanks to its powerful petrol engine, is also suitable for older tractors that either lack hydraulic power or do not have an additional hydraulic control circuit on the front loader.

NEW AND UNIQUE ON THE MARKET!

Many years of experience in the field of development and manufacturing have resulted in this model, a flail mower that is particularly characterised by its unique versatility and flexibility, and thus clearly stands out from the competition due to its range of applications. WHAT DO WE DO DIFFERENTLY? Front mower with petrol engine and Euro receptacle Works on all tractors with front loader completely without hydraulic connection Flexible to use Attachment to yard loaders, wheel loaders, municipal vehicles etc. possible TECHNICAL SPECIFICATIONS: 15 PK 4 tact-motor, 420 ccm Engine: 4 Stroke, 420 ccm, 15 HP LonCin Drive: Petrol engine (via 3 toothed belts) Euro front loader receptacle Working width: approx. 1.300 mm Total width: 1.400 mm Housing height 600 mm Hammer blades: 22 pieces, approx. 400g 2 impellers on the front housing Double spiral rotor (110 mm Ø) Height-adjustable trailing roller (100 mm Ø) Front protection: free-swinging, galvanised slats Packaging: Wooden crate Weight: approx. 340 kg Pkg. incl. packaging: 154x90x100 cm (LxWxH) Weight incl. packaging: approx. 376 kg The Jansen BMM-130 front-mounted mower is designed for front attachment and can be used in agriculture, on private land or in municipalities and communities. The petrol-driven drive makes this mower universally applicable and thus also suitable for mounting on yard loaders, wheel loaders, municipal vehicles and much more. It can be used flexibly and is particularly suitable for maintaining pastures, meadows and green areas with grass, bushes and smaller branches. EQUIPMENT FEATURES: The BMM-130 model has a mowing width of 128 cm. The mower comes standard with 22 specially hardened, approx. 400 g hammer blades. Stable running & guide wheels on the front are standard. With its uniform rotor load, the double spiral rotor ensures particularly smooth running and long durability with considerably less effort. In addition, the flail mower is equipped with a heavy trailing roller. The suspended, galvanised slats at the front of the mower unit prevents stones escaping.
