Description

The orchard balcony is a machine designed to support fruit picking and care work in orchards. Thanks to it, it is possible to significantly increase the efficiency of work and improve the comfort of performing individual activities related to harvesting and care of the orchard. The orchard balcony is designed to work with tractors with front or rear forklift truck mounted. The maximum lifting height depends on the lifting height of the front loader with which the orchard balcony works. The maximum lifting capacity of the working platform is 700 kg. The balcony can accommodate up to 2 people. The structure of the machine is made of welded and bolted steel elements.
