Parameters

Name	Unit
Tractor Power	30-60 HP
Weight	280 kg

Description

The BSF-60T stump milling cutter is designed to attach to your tractor and be powered by the PTO shaft (inclusive). The base frame is fitted with three-point linkage and stable support feet.

It is the perfect solution for removing stumps and stubs in all sizes and wood types and is handy whenever small hand grinders can't manage! The 20 shaping blades are made from hardened steel, and are screwed on the 60cm large milling wheel. These can be replaced individually. With a milling swivel range of 40 ° and a milling width of 60 cm, it effortlessly cleans up ingrained surfaces and removes tree roots up to a depth of 30 cm and a maximum height of 40 cm.

The milling head is vertically and horizontally swiveled with two hydraulic cylinders. The stump milling cutter is operated easily from the tractor cab.

The machine is built to be compatible with categories I and II on your tractor.

Technical specifications:

Recommended Tractor power: 30-60 HP

Weight: approx. 280 kg

PTO shaft rotation: 540 U/min.

Hydraulic connections: 2x double acting

Milling swivel range: 60 cm

Swivel angle: 40 °

Blades: 20 pc.

Milling height: approx. 40 cm above level

Milling depth: approx. 30 cm below level

Milling wheel rotation: 950 U/min.

Packaging dimensions: approx. 170x100x110 cm (LxWxH)

Weight incl. packaging: approx. 362 kg
