Description

The CAB-F (hammer) forest head is designed for crushing branches, trees, stumps, cleaning in forest spaces and civil works. It is especially used for crushing and cleaning debris from tree felling. It is equipped with treated double cut hammers and fastening system by means of a steel bar. Very resistant machine, the manufacture of the rotor with the perfect electronic balance allows an excellent crushing. The monoblock chassis system together with the skids for the height adjustment reinforced and with regulation system, allow to work in different heights. The opening gate system can be mounted mechanically or hydraulically. The construction is extremely solid and robust.

- Monohull chassis in anti-wear steel plate.
-360 ° floating hammer rotor shaft
-Axis fairing with steel bar.
-Skids for height adjustment.
-Built-in hydraulic motor.
-Motor safety valve.
-Transmission by pulleys and belts.
-Front and rear anti-projection chains.
-Back opening.
