Parameters

Name	Unit
Weight	1100 kg
Working width	1500 mm
Hammer PCs	24 pcs
Hydraulic pressure	220-240 bar
Oil flow	70-100 l/min

Description

The FA floating forest head model is especially suitable for excavators in different work spaces. It allows clean clearing in normal grass areas and in woody clearings of between 10 and 15 cm in diameter. The CAB FA model allows effective brushcutting in low brush and leafy areas. The cutting system is by means of treated double cutting hammers that extend the life of the cut. The machine allows for the installation of various accessories such as the Ripper Claw, also used in forest replanting, and the 120° turning system.

- Chassis in antiwear steel plate.
- 360° floating hammer rotor shaft and plates on the floating head
- Steel bar fairing shaft on the fairing head
- Supporting skids.
- Built-in hydraulic motor.
- Safety valve on the motor.
- Transmission by means of pulleys and belts
- Front and rear anti-spray chains.
- Rear opening door
- Rear door in FA-150
