Parameters

Name	Unit
Working width	730 mm
Blade	2 pcs
Weight	250 kg

Description

Brush with hydraulic disc, for brushcutting on medium and large farms, cuts the grass from the trunk, the disc embroiders and contours the trunk by clearing it of weeds.
Totally ecological, different working width measurements, with spring sensor or hydraulic sensor.
Possibility of interchanging blades with 6mm nylon thread.
3P Hydraulic Disc Brush
The brush with hydraulic disc 3P front pick-up is an implement holder on which you can adapt different equipment for collecting and aligning branches (pick-up brush) or knife cutting system for organic farming. The hitch is at the front of the tractor and its telescopic system allows you to move the collector or disc up to 2.30 mts. from the centre of the tractor.
Standard:
-730 mm hydraulic disc.
-Crazy blades.
-Tractor quick hitch.
-Acceptance filter.
-Support foot.
-Hydraulic lift/lower position.
-Electric controls with solenoid valves.
-Oil flow regulator.
-Lateral displacement of 2.30 mts. from the center of the tractor.
