Number of drums	2 pcs

Description

This Kraffter rotary mower/drum mower has a working width of 1.4 meter, making it ideal for use with mini tractors or compact tractors. The rotary mower is equipped with two drums, each with three blades attached to them, which cut the crop as close as possible. After cutting, the crop is deposited in a swath behind the machine. Rotary mowers are primarily used for cutting crops close so they can be processed into animal feed or easily removed from the field.
