**Parameters**

Name	Value
Weight	726 kg
Minimum HP	50 hp
Working width	2200-3700 mm

Description

The DDRH Mulching crusher system has an auger that moves the cut grass towards the tree trunk covering it, thus preventing the remaining grass from producing photosynthesis by the sun and drying under the blanket of grass thrown by the machine. The working niches of the TRB-SFN Mulching model are from 1.80m to 2.20m. Working and tractor powers from 60 hp to 100 hp. As for the Storm model, the DDHR-350 model allows working at minimum widths of 2.20m and maximum widths of 3.70m. Standard:

- Double hydraulic cylinder for wheel adjustment.
- Transmission through central and lateral groups.
- Integral protection.
- 540 RPM.
- Lateral grass distribution system.
- Lateral deflectors.
- Front wheels and rear roller.
- Fixed stand

Options:

- Hydraulic displacement: 305
- Rubber wheels: 676
