Description

Professional series of machines specialized in the application of liquid or solid fumigants products into the soil. All the distribution systems are managed by the computer for a precise control of the doses and a proportioned distribution. These machines are specially designed in collaboration with fumigants producers resulting in high safety standards and an optimal and equal distribution of the product into the soil. The series is composed by passive models (without soil processing) and by active models, with stone burier base, which allow a multiple function of the machine. Liquid fumigants distribution system: Universal 3 point linkage Cat. 2, Tractor PTO hydraulic pump, On board automatic hydraulic plant, Maximum pressure valve for hydraulic system, Height adjustable lateral pannels, Working depth adjustable by crank handle, Multifunction valve for product aspiration, work, cleaning and draining, In-line Removable filters, Moving speed proportioned distribution of the product, Lateral wheel for speed check, In-line flow-meter for distribution management, AISI316 nozzles, AISI316 drop-repellent system mounted on ploughshares, Ploughshares mounted with security bolt, Interchangeable wearing plates mounted on ploughshares, Pipe for product aspiration and draining, AISI316 product tank, Reserve tank for clean water, AISI316 pressure gauge, On board computer for distribution management.
