BUILT FOR THE EXTREME Designed for professionals. We use high quality material and parts, that are critical for the professional user in extreme and challenging conditions. Equipped with WIDIA teeth on heavy tool holder The housing is constructed of extra strong steel of at least 12 to 16 mm, with strategically placed reinforcements, protective covers and guards guaranteeing safety and high durability. **HEAVY DUTY ROTORSHAFT** With a rotor wall thickness of 20mm and engineered curved skids, we have designed our forestry mulcher to grind over - 7cm into the ground. Making it possible to completely clear fields with a perfect finish, leaving no treestumps or roots.
