Sparepart Weight	1600 g
Rotor Diameter	273 mm
Total diameter	512 mm
Max tree diameter	30+ cm
Minimum HP	170 hp

Description

Order now and get a gratis cardan shaft!

Super heavy and powerful. For professionals who want to cultivate challenging forest plots thoroughly. Heavy solid WIDIA-hammers remove overgrowth and tree stumps up to 70 mm below the surface. The extra reenforced hydraulic tilting frame supports the feeding of large shrubs and small trees and increases productivity. Ultimately suitable for owners and those working in challenging uncultivated woodland and heavily overgrown areas.
