Parameters

Name	Unit
Working width	1500 mm
Weight	760 kg
Hydraulic pressure	210-290 bar
Oil flow	80-130 l/min

Description

The DFR-Spy flail mower head allows you to work in both directions with the double inlet chassis and the standard ripper for all types of spider webs.

For work on brushcutting farms, paths, slopes, agriculture, gardening, green spaces and irrigation channels, civil engineering and roadsides and country roads. Vegetation control, clearing of bush elements, maintenance and weeding are the main jobs that occur in these machines. The working agility of the basic machine is due to the reliability of the hydraulic equipment with piston engines and the material with SSAB steel plating of the different series.

- Anti wear chassis.
- Hydraulic piston engine with valve anti-cavitation
- Two row of chains.
- Canning of the engine.
- Interchangeable support spikes.
- Support skids.
