## Description

High-quality disc hedge cutters are available in two different sizes, so every farmer can find the version that best suits his needs. Choose from sizes from 1000 mm to 1650 mm to effectively tackle problems caused by branches that encroach on roadsides, fieldsides or other areas. The cutter disc design allows you to cut branches, twigs and vegetation precisely, efficiently and even in large diameters to keep your area neat, tidy and problem-free. During cutting, the cutting disc system performs a rotating motion to ensure a perfect cutting result every time. The Aardenburg Disc Trimmer can be mounted on almost any arm machine, excavator and the factory adapter Aardenburg Trimmerframe 3in1, offered by Agrohof kft. This universal adapter is factory fitted to the trimmer for easy handling. Thanks to its sturdy and robust design, it will be a reliable companion for everyday work.
