Description

Expand the versatility of your Jansen® Compact Loader KL-200 with our optional attachments, specifically designed to maximize your productivity:
GRADING BLADE
Optimize your earthworks with our hydraulically adjustable grading blade with a maximum working width of 165 cm. Specifically designed for the Jansen® KL-200 Compact Loader. This attachment allows you to precisely level terrain and create flat surfaces. The working width can be flexibly adjusted by conveniently removing the 40 cm wide side wings. This results in multiple working widths: max. 165 cm, min. 84 cm.
The grading blade is characterized by its robust construction and user-friendliness, making it ideal for construction sites, landscaping, and agricultural applications. With variable adjustment options and an effective working width of 165 cm, it ensures consistent results and significant time savings during operation.
