Parameters

Name	Unit
Working width	4000 mm
Weight	4700 kg
Capacity (m³)	2.6 m³
RPM	540 rpm
Wheels	550/60-22.5 .
Working speed	4 km/h
Working depth	100 mm
Minimum HP	100 hp
Hydraulic pressure	160 bar
Oil flow	120 l/min

Description

Metal-Technik Stone Collector DZIK-4000

Stone Picking Machine, stone collector DZIK-4000 is used to collect stones from farmland. The machine is driven by a PTO shaft, the drive is transmitted by gear and chain transmissions protected by overload clutches, ensuring trouble-free operation. In addition, the machine is equipped with an automatic chain lubrication system.

The machine has a hydraulically lifted hitch, a stone hopper and arms. The hydraulic manifold has the ability to control the LS input. The hydraulic system is operated via a control panel from the operator's cab.
