|---|---|
| Weight | 50 kg |
| Working width | 2000 mm |
| Number of spring tines | 17 pcs |
| Number of tines (cultivator) | 11 pcs |

## Description

The Boxer EE riding arena leveler is robustly built and made from galvanised steel. The front is equipped with heavier spring tines to rip open the riding arena floor. Light tines are mounted on the 2nd row, which can be adjusted in height by means of a spindle to finish the ground. The depth can be adjusted with the rubber plate at the rear. This rubber plate also makes the ground smooth again, so that the riding arena looks perfect again.

Now also for the ATV!
Comes in a kit (assembly time 15 minutes).
