Parameters

Name	Unit
Length	1840 mm
Width	700 mm
Weight	375 kg
RPM	540 rpm

Description

The especially robust construction of the mulch mower EFGC-175 makes it stand out. It has a special reinforced angular gearbox and is outstanding in its operation.

The flail mower has a mowing width of 172 cm and is driven using a P.T.O, included as part of the delivery. From the middle of the suspension to the outer mowing edge on the right side, the distance measures 116 cm; with this measurement you can control whether the mower unit should cover the right track of your tractor.

Due to the open rear bonnet maintenance work or changing hammer blades will be facilitated. Please be informed that the bonnet has to be closed while operating.

This mower unit has the most heavy-duty gearbox in its class. Unlike mower units equipped with light Y blades, this mower has high inertia generated by the heavy hammer blades and heavy shaft. This allows our machine to perform better.

The 28 specially hardened, 0.8 kg hammer blades, which are arranged on a double spiral drive shaft, shred clippings to a minimum size. Even very high grass, bushy or straw-like clippings are no problem for this mower!

The mulcher additionally has a trailing roller and a freewheel gearbox. The cutting height can be set with the top controller and the runners mounted on the side. The suspended, galvanised slats at the front of the mower unit prevents stones escaping.

The mower unit is hung using the three point linkage of your tractor (from Cat. I. upwards). Your tractor should have at least 30HP.

Technical specifications:

Length: 1840 mm

Width: 700 mm

Mowing width: approx. 1720 mm

Weight: 375 kg

Mounting: three point hitch from Cat. I

Tractor: min. 30 HP

P.T.O: Included in delivery

Rpm: 540

drive shaft Ø: 110 mm

trailing roller Ø: 105 mm

Drive: 3 piece drive belt

Packaging: wooden crate

Dimensions of packaging: approx. ca. 198x87x81 cm (L x W x H)

Weight including packing: approx. 408 kg
