**Parameters**

Name	Value
Weight	510 kg
Length	2160 mm
RPM	540 rpm

Description

The especially robust construction of the mulch mower EFGC-220 makes it stand out. It has a special reinforced angular gearbox and is outstanding in its operation.

The flail mower has a mowing width of 217 cm and is driven using a P.T.O, included as part of the delivery.

This mower unit has the most heavy-duty gearbox in its class. Unlike mower units equipped with light Y blades, this mower has high inertia generated by the heavy hammer blades and heavy shaft. This allows our machine to perform better.

The 36 specially hardened, 0.8 kg hammer blades, which are arranged on a double spiral drive shaft, shred clippings to a minimum size. Even very high grass, bushy or straw-like clippings are no problem for this mower!

Due to the open rear bonnet maintenance work or changing hammer blades will be facilitated. Please be informed that the bonnet has to be closed while operating.

The mulcher additionally has a trailing roller and a freewheel gearbox. The cutting height can be set with the top controller and the runners mounted on the side. The suspended, galvanised slats at the front of the mower unit prevents stones escaping. The mower unit is hung using the three point linkage of your tractor (from Cat. I. upwards).

Your tractor should have at least 50HP.

Technical specifications:

Length: 2160 mm

Weight: approx. 510 kg

Mounting: three point hitch from Cat. I

Tractor: min. 50HP

P.T.O: Included in delivery

Rpm: 540

drive shaft Ø: 120 mm

trailing roller Ø: 105 mm

Drive: 4 piece drive belt

Packaging: wooden crate

Dimensions of packaging: approx. 239x87x82 cm (LxWxH)

Weight incl. packaging: approx. 537 kg
