Parameters

Name	Unit
Row spacing	70 cm
Minimum HP	30 hp
Width	2170 mm
Length	1150 mm
Height	1170 mm
Weight	380 kg
Other	Row spaces can be adjusted

Description

The Inter-Row Rotary Cultivator is an agricultural machine specially designed for tillage between rows. This machine helps farmers to weed between plants and loosen the soil without damaging the plants. A wide unit row cutter is particularly useful as it can cover a larger area in one session, increasing efficiency and reducing work time.

Optionals:

- Furrow Plough Unit
