

Belafer FFLM-120

Multi-row Rotary tiller 120 cm

Parameters

Name	Unit
Working width	1200 mm
Minimum HP	80 hp
Number of rotavator blade	72 pcs
Weight	790 kg
Working depth	12 mm
Maximum HP	110 HP

Description

Multi-body rotary tiller with variable width for work in different plantations and for different tractor powers. Its use in plantations of Asparagus, tomatoes, artichokes and all kinds of nurseries, where the ploughing and preparation of the land or the elimination of the weeds, becomes essential. The FFLM and FFRE models are manufactured in variable widths of bodies from 0.50 mts. to 1.10 mts. The mechanical and hydraulic systems between bodies allow the centering and decentering of the bodies to the different measures of plantation widths.

The equipment adapts perfectly to the terrain, being possible in some models to customize them to the same plantation.

FFLM multi-body agricultural machine

Multi-body rotary tiller, especially for greenhouses and nursery plantations. Weeding and ploughing of all types of land, preparation of seedlings, etc. Suitable for working in vineyards, for small tractors.
