Capacity (kg)	700 kg
Capacity (m³)	1.1 m³

Description

The 200 cm hydraulically tiltable container is a massive and reliable tool that is ideal for the safe movement of heavy and large objects. The hydraulic mechanism allows easy lifting and sinking of the crate, thereby minimising physical effort and increasing efficiency. The box is made of high-quality steel, which guarantees long life and high load capacity. The crate can be easily transported and handled, thus effectively helping to move crops or assets in economic areas. Its use is varied: it can be used to store and move fruits, vegetables or even tools.
