Parameters

| Name | Unit |
|---------------|---------|
| Working width | 650 mm |
| Side move | 500 mm |
| Rotor knife | 4/8 pcs |
| RPM | 540 rpm |
| Hydraulic oil | 20 L |
| Weight | 410 kg |

Description

BRD in-line power harrows are intended for work in orchards, primarily for cultivation between trees with a minimum distance of 50 cm. It can work in difficult conditions and hilly terrain thanks to the tilting of the working head. BRD removes grass from the ground and does not form a hard layer under the treated surface. The working part of the machine is a rotary harrow with 4 rotors, while there are two hoes on each of them. The working width of the BRD is 70 cm, and the displacement to the side is about 50 cm. The maximum depth of tillage is up to 15 cm.
