Parameters

Name	Unit
Working width	650 mm
Side move	500 mm
Rotor knife	4/8 pcs
RPM	540 rpm
Hydraulic oil	20 L
Weight	410 kg

Description

BRD in-line power harrows are intended for work in orchards, primarily for cultivation between trees with a minimum distance of 50 cm. It can work in difficult conditions and hilly terrain thanks to the tilting of the working head. BRD removes grass from the ground and does not form a hard layer under the treated surface. The working part of the machine is a rotary harrow with 4 rotors, while there are two hoes on each of them. The working width of the BRD is 70 cm, and the displacement to the side is about 50 cm. The maximum depth of tillage is up to 15 cm.
