Weight	890 kg
Working width	2000 mm
Minimum HP	54 hp
CAT	II
RPM	540 rpm
Rotor knife	10/20 pcs
Working depth	260 mm

Description

Power harrows are modern machines intended for cultivating various types of land. Power harrows finely cultivate the soil, clean it and distribute evenly over the entire working width to create the perfect seedbed: they are usually used for secondary tillage after plowing and can break even the most compacted furrows in one pass. The maximum processing depth of these models is up to 28 cm.
