Description

The two-wheel tractor FPM 406 is a universal machine designed both for use in agriculture (particularly in market gardening, greenhouses, fruit growing, and viticulture), and for a variety of public utility works. Thanks to modern manufacturing technology and optimal structure, this machines is incredibly easy to use and manage and has a low energy consumption. This two-wheel tractor is equipped with an extremely precise and reliable gearbox with eight speeds (4 + 4) with the option of differential lock. A large variety of implements can be mounted on it.
