Description

The Francini S50 is a high-capacity, professional manure spreader designed for the demanding needs of medium and large farms. Its reinforced steel platform and four vertical beaters ensure wide, consistent and precise distribution, even with large volumes of organic material. The single-axle design and mechanical braking system provide stability and safety, while the 4-meter loading bed and 5000 kg total weight make the S50 a durable and reliable choice for long-term agricultural work.
