Description

The hand-guided Jansen GF-600pro Trencher instantly creates trenches and ground channels with a width of 10cm and a maximum cutting depth of 60cm. It is the perfect solution for the clean and fast creation of trenches and ground channels. The powerful 13,5 HP petrol engine from Briggs&Stratton provides the necessary power. We deliberately opted for this strong engine from the Briggs&Stratton brand.

The cutting chains with 27 carbide-alloyed shaping blades are screwed onto the robust digging chain and can be individually replaced. The long blade allows a maximum cutting depth of 60cm. The excavated material is shifted aside using a screw conveyor. An excavation capacity of up to 60m per hour is possible.

The application area extends from laying underground cables e.g. for domestic garden lighting, to laying pipelines for garden irrigation, to adding drainage, among many other things. Thanks to the Jansen GF-600pro Trencher, you remain flexible and independent and save the hard cash otherwise needed for expensive mini-excavators. What's more, in comparison to heavy equipment, the trencher does not cause major damage to your garden. The compact model also allows a passage width of 95cm. It can therefore effortlessly access almost any garden or yard.

Technical specifications:

Engine: 13,5 HP petrol engine, 4-stroke, Briggs&Stratton

Excavation capacity: 60m/hour

Digging width: 100mm

Digging depth: 200, 400, 600mm

Cutting teeth: 27 teeth with carbide alloying

Chain length: 2057mm

Chain speed: max. 550 m/min.

Tyres: 15x6.00-6

Assembled dimensions: approx. 217x95x116 cm (LxWxH)

Weight: approx. 184kg

Packaging dimensions: approx. 110x79x81 cm (LxWxH)

Weight on dispatch: approx. 220 kg
