Parameters

Name	Unit
Minimum HP	100-200 hp
RPM	1000 rpm
Mincing blade	4 pcs
Tunnel entrance	40x60 cm
Outcoming piece	max 2 cm
Max tree diameter	40 cm

Description

The Greentec Jaguar 40 is a high-performance drum chipper for tractors with 100-200 hp. It handles wood up to 35-40 cm in diameter and weighs approximately 2200 kg. It features an independent hydraulic cooling system, integrated blowing system with Venturi airflow, and a robust 20 mm drum housing. Quick-change knives, Hardox wear plates, and easily accessible service points ensure long service life. The upper infeed roller is powered by heavy-duty, low-maintenance Poclain motors. Optional equipment includes winch, various infeed table configurations, and a fully hydraulic discharge chute.
