### Parameters

Name	Unit
Dimensions	1250x820x1500 mm
Feed height	1000 mm
Ejection height	1400 mm
Weight	190 kg

### Description

The GTS1500E is a first-class shredder. Thanks to its solid and stable construction, it is an especially robust device and is also suitable for commercial use. The powerful 15 HP LONCIN G420F engine gives you complete independence from the power grid so that the shredder can even be used in remote locations. The engine is equipped with a recoil-starter and an electric starter (battery included). Thanks to the high ejection chute, which is 180 degree turnable, you can expel the chippings directly onto a trailer. The GTS-1500E feeds material into the shredder itself with formidable power, thanks to the 2 rotating blades which rotate on a shaft and run against a counter blade. This ensures highly efficient working.

According to the texture of the wood the shredder shreds branches of a maximum diameter of 12 cm!

Using the supplied towing hook, the unit can be towed with ease to any location. The foldable drawbar makes it easier to feed the shredder and is also a plus when it comes to storage. The shredder is very maintenance-friendly. Parts such as blades, counter blades, etc., are easy to reach. In a few easy steps you can remove the whole hopper in order to gain better access to wear parts. The bearings are also equipped with grease nipples.

Technical specifications:

4-stroke OHV engine, 420 ccm, 15 HP LONCIN G420F

Recoil starter vElectric starter

Battery included

Cut material: Ø 120 mm (depending on wood condition & type)

Total weight (dry): approx. 190 kg

Fuel type: petrol

Tank capacity: 6.5 litres

Fuel consumption: Approx. 1.2 - 1.5 L/h

Ejection height: 1400 mm

Feed height: 1000 mm

Number of blades: 3 blades (2 blades, 1 counter blade)

Dimensions funnel: 47x34 cm (LxW)

Dimensions: approx. 125x82x150 cm (LxWxH)

Measurements of packaging: approx. 113x59x108 cm (LxWxH)

Weight including packaging: approx. 230 kg
