Parameters

Name	Value
Weight	60 kg
Mowing width	580 mm

Description

The Jansen HGM-58 high grass mower is a very useful machine when it comes to mowing in hard-to-reach places. Many places cannot be reached with a conventional lawn mower and this is exactly where our wheel driven brush cutter is used. It is ideal for mowing on and under fences, in meadows and lawn edges, etc.

The cutting width of approx. 58 cm is achieved by the 4 hardened steel cutting blades fixed to the mowing disc, which are ground on both sides and mounted so they can be rotated. The upper disc throws the mown and shredded material to the side and the laterally mounted skirt prevents the material from flying around and ensures that the mown material can be removed cleanly.

With the use of the installed 6 HP petrol engine from LonCin, you are completely independent and do not have to rely on annoying power cables.

The engine starts well and is started using a recoil starter; the handle bar height is fully adjustable and can be set corresponding to your body height.

Thanks to its large, stable wheels and its own wheel drive, the Jansen HGM-58 is very easy to manoeuvre... even on meadows and lawns with a maximum gradient of up to 35%.

Technical specifications:

Engine: 196cc, 6 HP petrol engine, LonCin

Drive: Own wheel drive

Number of blades: 4

Mowing width: approx. 58 cm

Weight: approx. 60 kg

Package packaging: 107x57x84 cm (LxWxH)

Weight including packaging: 85 kg
