Description

This trimmer bar is one of our most popular models. It can be delivered in two widths. With the 2000-5 or 3000-5 bar you are able to trim branches in lighter hedges consisting of branches up to max 5 cm in diameter. It is well suited to all types of hedges that are maintained on a regular basis. It is compatible with most Elkaer tool frames or you can mount it onto e.g. excavators.
