Working height (vertical)	5000 mm
Working height (horizontal)	4500 mm
Oil flow	45 l/min
Hydraulic pressure	190 bar
Weight	632 kg

Description

The proper machine for challenging jobs. The HK Pro-X is an all-powerful tool frame. The robust construction makes the HK Pro-X capable of carrying a weight of 500 kg, even when the tool frame is in its maximum reach position – i.e. 5 meters vertically and 4.5 meters horizontally. The HK Pro-X has an unparalleled performance, thus letting you focus on the job, and not the functional limitations of the working tool. And it still provides you with the needed flexibility. The HK Pro-X may work on both sides of the tractor and the mounted tool can be rotated 220°. The HK Pro-X can be front or rear mounted directly onto the three-point-hitch of the tractor and it can be combined with all saws and trimmer bars from our product range.
