Parameters

Name	Value
Weight	240 kg
Working width	1800 mm
Hydraulic oil	20 L

Description

The hydraulic Jansen HMB 180 sickle bar / hedge shears are the ideal attachment for your small or compact tractor.

The extension arm is very well suited to cutting and trimming hedges and bushes, especially in hard to reach areas.

This cutter bar provides for completely easy and time-saving cutting of large hedges and bushes. The material to be cut can have a diameter of up to 2.5 cm.

The device is fitted in the three-point hitch of your tractor (Cat. 1 suspension) and has its own oil supply. The hydraulic oil tank has a volume of 20 litres.

Now, you just need the PTO shaft connection (540 rpm) of your tractor as a drive mechanism.

The cable-hose assembly for the control valve with control levers is long enough for you to be able to install in a suitable, easily accessible place on the tractor.

Due to its light weight, this device is also specifically suitable for compact tractors with 20-25HP and more.

Technical specifications:

Working width of hedge shears / sickle bar: 180 cm

Hydraulic oil: 20 litres

Weight: 240 kg

Power requirement: approx. 20HP and up

Packaging dimensions: 175x80x191 cm (LxBxH)

Shipping weight: 250 kg
