Weight	7.5 kg

Description

The optional log lifter for the log splitter models Jansen HS-20H110, HS-20H110E and HS-20H110K.
The mechanical log lifter helps you to lift thicker logs or heavy timber lying on the ground with a sturdy arm. A chain connects the log lifter to the splitting wedge and is simply hooked into it. When the wedge is raised, the log lifter lifts and places the log under the splitting wedge on the bottom plate of the log splitter where it can be conveniently split.
Technical specifications:
Dimensions of packaging: 73x70x15 cm (LxWxH)
Net weight: 7.5 kg
