Number of discs	5 pcs
Diameter of discs	800 cm
Weight	420 kg
Working speed	3-6 km/h

Description

The HS3800 saw is designed with 5x offset blades, making it highly efficient tool for maintenance of heavy hedges, forest paths and shelterbelts with branch thicknesses of up to 250mm. The construction with the offset blades and the huge working width ensures a high very high work speed, with the ability to cut most hedges and trees in just one run, without the need to go over the work area more than once. The HS3800 combines with the reach arms HK Ex, HK Pro-X or HK Max, and powerful reach arms from other manufacturers.
