Max tree diameter	40 cm

Description

Jaguar 40 Track - Compact Power on Tracks

The **Jaguar 40 Track** is a high-performance tracked wood chipper designed for demanding forestry and municipal tasks. Powered by a 140 HP Stage V Hyundai engine, it delivers efficient chipping up to Ø400 mm with minimal fuel consumption thanks to its Venturi airflow system.

Equipped with a robust steel drum, hydraulic cooling, and intuitive touchscreen control (GCS 3.0), it offers programmable settings for different wood types and remote operation. The tracked chassis ensures excellent mobility on rough terrain, while optional crane feed and winch systems enhance productivity.

Built for professionals who need reliability, throughput, and smart control in one rugged package.
